Appendix

Medication Use Pre- and Posthospitalization for Chronic Obstructive Pulmonary Disease in a Cohort of Elderly Medicare Advantage Plan Patients
Qingqing Xu, MS; Sarah S. Laxa, PharmD; Omar Serna, PharmD, BCACP; Sujit S. Sansgiry, MS, PhD

This Appendix has not been edited and is provided as supplemental materials for this article, which was published in *American Health & Drug Benefits* in December 2019.

Supplementary Figure. Illustration of Study Groups\(^a\)

\[ N = 1187, \text{No LABD Group} \]

\[ N = 165, \text{LABD Group} \]

\[ N = 350, \text{COPD Medication Group} \]

\[ N = 1002, \text{No COPD Medication Group} \]

\(^a\)Comparison groups of patients based on prescription fill for LABD or not, and fill for COPD medications or not.
COPD indicates chronic obstructive pulmonary disease; LABD, long-acting bronchodilators
